

META

METAPUZZLE

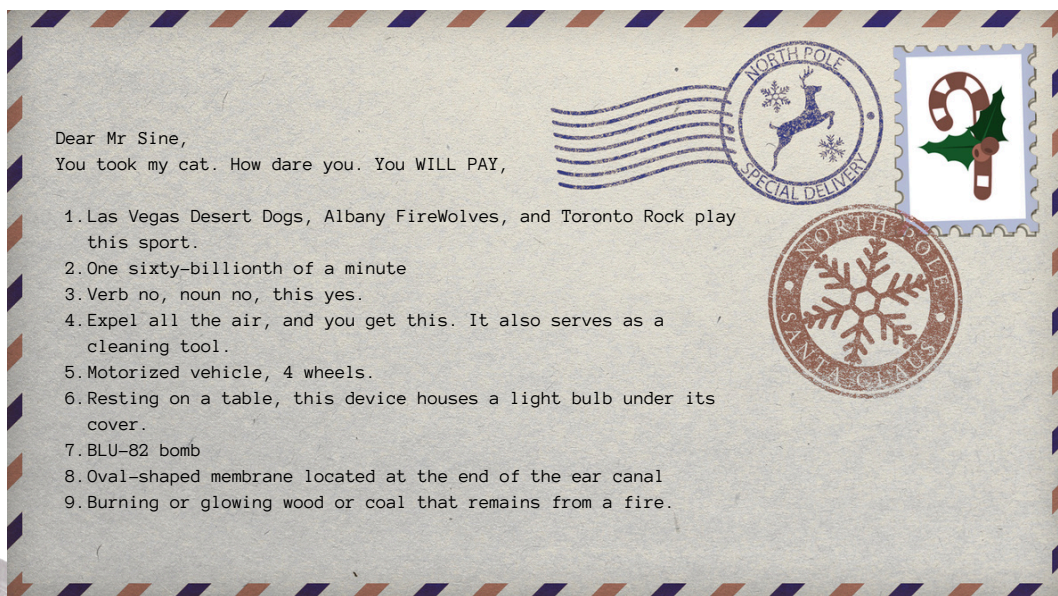

By: Eliana G.

In puzzle hunts, there is often a special puzzle known as a 'Metapuzzle'. Metapuzzles incorporate the answers to previous puzzles in order to ensure the solver has solved the puzzles before the meta. In this case, since these puzzles were optional, we will instead be using the tricks in the previous puzzles and not the answers. Good luck!

Last night Mr. Sine was killed. It is up to you detective to find out who the killer is and at what time the killing took place. After looking in the evidence bin you find two objects of interest. First a letter the killer sent to Mr. Sine about a week before the murder. And second at tattered piece of paper left at the crime scene, even the best agents can't figure out what it is.

EVIDENCE #120947
