

META

## METAPUZZLE

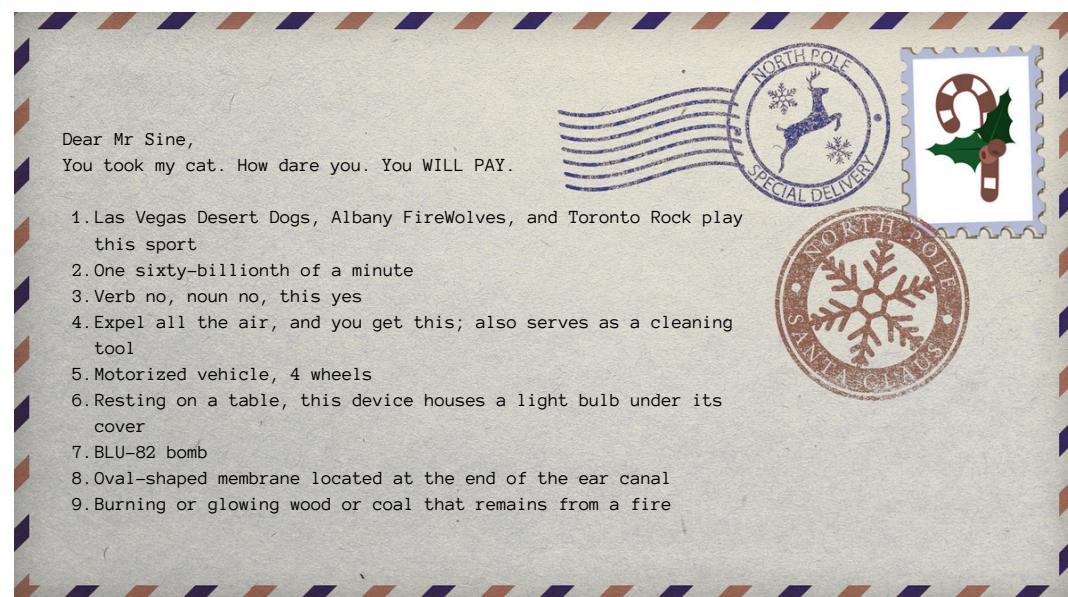

By: Eliana G.

In puzzle hunts, there is often a special puzzle known as a “Metapuzzle”. Metapuzzles incorporate the answers to previous puzzles in order to ensure the solver has solved the puzzles before the meta. In this case, since the previous puzzles were optional, we will instead be using the tricks in the previous puzzles and not the answers. Good luck!

Last night, Mr. Sine was killed. It is up to you, detective, to find out who the killer is and at what time the killing took place. After looking in the evidence bin, you find two objects of interest. First, a letter the killer sent to Mr. Sine about a week before the murder; and, second, a tattered piece of paper left at the crime scene which the best agents can't decipher.
